2011 RATE APPLICATION 1 Refer to Kenergy's response to item 1.a., page 3 of 3, and item 12.d. of the Second Data 2 Item 1) Request of Commission Staff ("Staff's Second Request"). The response to 12.d. states that the present 3 rate for the 19,500 Lumen-250W-MH-Flood Light should be \$8.61. Kenergy provided a revised 4 Exhibit 10A, page 6, in response to item 1.a. to correct a different light. The revised Exhibit 10A, page 5 6, does not include a correction for the 19,500 Lumen-250W-MH-Flood Light. Provide an updated 6 revised Exhibit 10A, page 6, showing a correction for this light. 7 8 Response) Item 1, pages 2 -3 of 3, contain the above referenced information. 9 10 Witness) Steve Thompson 12 13 14 15 16 17 18 19 20 21

### 2011 RATE APPLICATION

2 Item 2) Refer to Kenergy's response to item 1.c. of Staff's Second Request.

a. A copy of an agreement with Meadow Hill subdivision was provided. However, the present rate for this subdivision of \$2.25 shown in Kenergy's notice does not appear in the contract provided. Explain why this contract has not been updated.

b. The response indicates that there are three separate contracts for the lighting rates. In the Commission's regulations, 807 KAR 5:011, Section 13, states that, "Every utility shall file true copies of all special contracts entered into governing utility service which set out rates, charges or conditions of service not included in its general tariff." Explain why Kenergy has not filed a copy of the three lighting contracts with the Commission.

Response a&b) Kenergy is the consolidation successor of Henderson-Union Electric Cooperative and Green River Electric Corporation effective July 1, 1999 and approved by the Commission in Case 99-162. These agreements were executed in the 1970's and the billing and member records are not available in a complete manner back to that period. Therefore, Kenergy cannot provide responses to items 2a and 2b as to why the 1970 contracts were not filed with the Commission, or updated during the 1970 - 1990's.

I would like to offer that it appears from the agreement found in PSC 2<sup>nd</sup> data request Item 1c, page 2 of 2, that the intent was to charge the rate found under "their regular S.L. schedule" for the lights installed in the subdivisions. The total revenues received would equate to the tariff rate for street lights times the number of lights installed. Under this concept, the tariff rate was used to bill the

### **2011 RATE APPLICATION**

1
•

**Item 3)** Refer to Kenergy's response to item 1.f. of Staff's Second Request and Exhibit B of the application, First Revised Sheet No. 35B.

a. Explain how the Replacement Cost Factor of 1.26 percent on First Revised Sheet No. 35B was derived.

**b.** State whether the proposed recovery of replacement cost means that Kenergy intends to set aside funds to help with the replacement of equipment if replacement is needed prior to the end of its useful life.

c. Given the typical accounting treatment of early plant retirements, explain why it is necessary to include this type of component in the facilities charge.

Response a) The 1.26 factor is based on the present value of the expected replacement costs. The expected replacement costs are determined by an actuarial approach based on the Iowa-type survivor curves, which are survival frequency distributions developed by Iowa State University for use in depreciation studies for electric utilities. In this case, the present value replacement cost is determined by calculating the replacement cost for each year based on the failure percentage given by the 30-year survivor curve, adjusted for 3% inflation and a 6% discount rate. Item 3, page 3 of 3, provides the calculations.

Response b) Yes.

า

### **2011 RATE APPLICATION**

-
7
-1

Response c) The two are not directly related. Although plant retirements are factored into the depreciation rates, the effects are primarily from historical levels of retired plant due to upgrades and system improvements, rather than premature plant failure. The Replacement Cost Factor is needed to add revenue to pay for early retirement of dedicated facilities due to premature failure. It acts as a risk premium based on the potential for failure that spreads the cost over all customers subject to the facilities charge. Therefore, the capital recovery component of the facilities charge includes two elements. The first is based only on amortizing the original cost over 28 years (the useful life based on the composite depreciation rate of 3.55%) not including a component for retiring plant that fails earlier. The second is the Replacement Cost Factor

Item 4)	Refer to Kenergy's response to item 1.j. of Staff's Second Request and Exhibit B of the
application, F	first Revised Sheet No. 137. The response states that the text change was made for
clarification p	urposes. State whether the text change indicates a change in Kenergy's current practice.
If yes, provide	e the reason for the change.
Response)	The text change does not indicate a change in Kenergy's practice. It represents an
attempt to imp	prove internal communications.
Witness)	John Newland

			THIRD DATA REQUEST FOR INFORMATION
4			2011 RATE APPLICATION
1			
2	Item 5)	Refer	to Kenergy's response to item 1.k. of Staff's Second Request and Exhibit B of the
3	application, F	irst Rev	vised Sheet Nos. 139 and 139A.
4		a.	Explain whether Kenergy encourages customers to install the trench and conduit
5	rather than K	energy i	nstalling it or Kenergy having it installed.
6		b.	Explain the reason for the difference in cost between the \$8 per foot if a
7	contractor per	rforms t	he trenching and \$12 per foot if Kenergy performs the trenching.
8		c.	Explain the circumstances under which a contractor would perform the
9	trenching rath	ner than	Kenergy performing the trenching.
10			
	Response	a)	The tariff, as stated, attempts to encourage customers to install the trench and
12	conduit. Acti	ual expe	erience has shown improved coordination and less overall cost with this practice.
13		b)	The unit cost for a contractor is a negotiated fee and represents an average based
14	on the type o	f work	anticipated. The Kenergy unit cost is based on actual experience for work orders
15	where Kenerg	gy perfo	rmed trenching.
16		c)	A contractor will always be the first choice and Kenergy will perform the work
17	if the contract	tor is un	available.

### **2011 RATE APPLICATION**

1

2

3

4

Item 6) Refer to the response to item 2 of Staff's Second Request. State whether the Non-Fuel Adjustment Clause Purchase Power Adjustment rate of (\$.001005024) is used in the billing analysis provided in Exhibit 10A of the application. If yes, state where in the billing analysis it is used.

5

6

7

**Response)** Yes, it is included in the calculation of proposed "Rider" revenue for each non-direct served rate class. It is included as follows:

8 Exh. 10A, pg. 14, col. K, ln. 7 \$(1,146,244)
9 Exh. 10A, pg. 1, col. F, ln. 37 ÷1,140,513,641 KWH
10 \$(0.001005024) per KWH
11 Unwind Rider + \$0.0020873 per KWH
12 Exh. 10B, col. D, ln. 26 + 0.000914 per KWH

Proposed "Rider"

13

14

15

For example: Residential KWH sales of 738,388,323 x \$0.001996276 = \$1,474,010 as shown on Exh. 10A, page 1, col. H, ln. 7 (any differences are due to rounding).

\$0.001996276 per KWH

17

16

The Unwind Rider is the current wholesale net Rider of \$0.002 per KWH grossed up for losses for a retail equivalent. The \$0.000914 is equal to the loss adjusted change in the base wholesale rate, which is a roll-in of environmental surcharge. It is added back as a Rider to reflect that it is revenue neutral.

"CT" or Current Transformer Rated Meters are set at accounts that require Response **b**) instrument transformers to be metered safely and efficiently. They are used to keep dangerously high voltages and currents out of the meter sockets so they may be maintained safely by service personnel. "CT^" meters in the response to 18.h should have actually used the term "Instrument Transformer Rated" instead of CT Meter. To be in compliance with PSC testing requirements for instrument transformer rated accounts all CT's and PT's (instrument transformers) are to be tested when the meter is tested. Because of the need to have a "load" or current flow through the CT's when being tested, additional testing equipment is required over and above Kenergy's field test kits, if the account is not loaded at the time of test. Kenergy employed the services of a meter testing contractor to perform the tests on all instrument rated accounts. The contractor is required to have and use the special testing equipment to be able to apply a load on the instrument transformers if required for testing during the site test/inspection to meet PSC requirements. This accounts for the increase in account 597.000 during the test period. Kenergy also downsized its' meter shop by not replacing personnel upon retirements of two individuals, therefore, Kenergy does not have the manpower available to perform these tests in-house.

2011 RATE APPLICATION 1 2 Response b) Biggest Loser - Incentive program awarded to employees that lost the most 3 weight and committed to a healthier lifestyle. 4 Moving Expenses - Amount agreed upon by incumbent CEO and board for payment of moving expenses. 5 Retirement Gifts - Retirement awards presented to employees in appreciation 6 7 for years of service to the cooperative. Service awards - Recognition awards given to employees for every five years 8 9 of service. 10 United Way - Incentive awards to increase employee financial involvement in United Way. 12 The costs were removed for rate-making purposes. (See Exhibit 5, page 5, line 12, column k). 13 14 Witnesses a & b) Keith Ellis and Steve Thompson 15 16 Response This rate represents the hourly rate of the one part-time employee. c) 17 18 Response d) See response to item 14e. Yes, the proforma overtime rate includes the board 19 approved wage rate changes implemented on January 1, 2011, two months before the rate application 20 was filed. See Exhibit 5, page 5f, column q and r. However, these rates were applied to employee levels at June 30, 2010. 21

### **2011 RATE APPLICATION**

Response e) Kenergy objects to this data request on the grounds that the January 1, 2011 wage rates submitted by Kenergy in its application in Exhibit 5, page 5, constitute a known and measurable change, which was applied to <u>test year-end</u> employee levels. The Kenergy board approved the wage rates at its December 2010 meeting, and the rates were implemented on January 1, 2011, two months prior to the filing of the application. However, without waiving the objection, Kenergy attaches hereto as item 14, page 4 of 7, a modified Exhibit 5, page 5.

Further, three other adjustments in the application that utilized January 1, 2011 price levels have been modified to use June 30, 2010 price levels, and are attached hereto as item 14e, pages 5-7 of 7.

A comparison of the four modified adjustments using June 30, 2010 price levels to the original adjustments using the known and measurable levels of January 1, 2011 applied to test year-end levels of activity follows:

	<u>Modified</u>	<u>Original</u>	<u>Change</u>
	Increase	Increase	Increase
	(Decrease)	(Decrease)	(Decrease)
	<b>Expenses</b>	<u>Expenses</u>	<u>Expenses</u>
Labor	(\$ 15,136)	\$183,562	(\$198,698)
Overheads Related to Labor	(\$ 92,481)	(\$113,897)	\$ 21,416
Contractor Vegetation Management	(\$636,258)	(\$967,153)	\$330,895
Economic Development Payment			
From Wholesale Power Supplier	\$ 49,472	\$ 83,972	<u>(\$34,500</u> )
	<u>(\$694,403</u>	<u>(\$813,516</u> )	<u>\$119,113</u>

Using the modified adjustments, increases test year expenses by \$119,113 over the original adjustment level and therefore would increase the revenue requirement.

2011 RATE APPLICATION Item 15) Refer to Exhibit 5 of the application, pages 6, 6c, 6d and 6e. Revise all schedules as necessary using wages calculated in 14.d above using 6/30/10 wage rates. Response) The response to item 14e contains the above referenced information. Witness) Steve Thompson 

### **2011 RATE APPLICATION**

1
2

**Item 16)** Refer to Exhibit 5 of the application, page 6.

3

a. Line 1 shows an adjustment to test year health insurance expense of \$305,724.

4

Fully explain the reasons for an increase of this magnitude.

5

6

b. Line 6 shows an adjustment to test year pension expense of (\$507,210). Fully

explain the reasons for a decrease of this magnitude.

7

9

10

8 Response

a) The health insurance increase was due to a 5% increase in the overall rates by

the Kentucky Rural Electric Cooperative group plan plus an additional 10% surcharge assessed to

Kenergy due to excessive claim utilization the previous plan year.

12

Witness) Keith Ellis

13

14

15

16

17

18

19

**Response** b) Please refer to PSC 1<sup>st</sup> data request, item 27, page 2 of 3. This schedule

indicates that the majority of the decrease occurred in the defined benefit and contribution plan for the

former Green River Electric employees, The main impetus behind this decrease was the transfer of the

employees in this plan to the defined benefit and contribution plan for the former Henderson-Union

employees effective October 1, 2010. The proforma cost excludes \$384,000 of settlement losses

booked during the test year and is simply based on 19.2% of proforma regular wages.

20

### **2011 RATE APPLICATION**

2

3

**Item 20)** Refer to Exhibit 5 of the application, page 9, Contractor Vegetation Management Adjustment.

4

5

6

a. The response states that the number of miles cleared during the test year was above normal for a 12-month period. What does Kenergy consider to be the normal number of miles cleared during a 12-month period?

7

8

**b.** Explain how Kenergy determined that 1,103 miles was appropriate to use for calculating its pro-forma vegetation management expense.

9

c. Provide the actual miles cleared for the calendar years 2006, 2007, 2008, 2009 and 2010.

10

Response a) An average of 1,080 miles cleared per year over a five-year period.

13

12

**Response** b) Beginning in 2005, Kenergy's board of directors and management placed a renewed emphasis on vegetation management as a means of improving reliability. With that came a

14

15

commitment to provide adequate funding for the program. It is common for electric utilities to strive

16

to achieve a cycle of between 4-5 years in an effort to balance the cost of clearing right-of-way with

17

the anticipated reliability benefits. At the time, Kenergy determined that it was cost prohibitive to

18

institute a cycle less than approximately six years and began implementing that planned approach. Shortly after this, all utilities were required to submit a vegetation management plan to the Kentucky

19 20

Public Service Commission, in part identifying their VM cycle. Kenergy's cycle length is consistent

21

with this approach and is stated as not to exceed six years.

### 2011 RATE APPLICATION

A second objective for Kenergy was to reduce the flext cycle length to a level
more consistent with the 4-5 year timeframe. As a result of Kenergy's continued commitment to its
VM program, we will begin meeting the objective of reducing the cycle to 5 years beginning in 2011.
Kenergy maintains approximately 5,400 miles of overhead line. In order to achieve a 5 year VM cycle
length, an average of 1,080 miles will need to be cleared each of those 5 years. 1,103 represents
mileage associated with a specific set of feeders to be cleared in 2011 and is consistent with the
average mileage associated with a 5 year VM cycle.

10	Response	c)	2006	-	736 miles
			2007	-	993 miles
12			2008	-	916 miles
13			2009	••	939 miles
14			2010	-	1,152 miles

FW: Economic development budget for 2011

Steve:

Based on this information we reduced the amount from \$98,000 to \$63,500.

From: Russ Pogue [mailto:Russ.Poque@bigrivers.com]

Sent: Thursday, October 14, 2010 10:58 AM

To: <a href="mailto:snovick@kenergycorp.com">snovick@kenergycorp.com</a>; Burns Mercer; Kelly Nuckols; Bill Blackburn; Mark Bailey

**Cc:** David Hamilton; Izell White; Tim Gossett **Subject:** Economic development budget for 2011

As a result of proposed budget reductions for 2011, the economic development budget has been reduced from \$201,000 to \$132,300. The reduction totals \$68,700. The contribution to each of your budgets will depend on the number of customers at the end of the year, but generally breaks down to 50% Kenergy, and 25% to JPEC and MCRECC. Our board of directors has not passed the budget at this time, yet I know you are in the process of budgeting and wanted to inform you of this potential change. If you have questions please let me know.

Thanks,

Russ

# RESPONSE TO THE COMMISSION'S FIRST DATA REQUEST FOR INFORMATION

### **2011 RATE APPLICATION**

### **Most Recent Annual Meeting**

The meeting was held June 8, 2010, at the Sportscenter in Owensboro, Kentucky. Registration for the meeting ran from 3:00 p.m. to 6:30 p.m. Member-owners and their families were served a light meal consisting of a pork loin sandwich, chips, drink and popcorn. The Annual Meeting was in the format of an Energy Expo. Vendors included: Sun Windows, Neel, Crafton & Phillips LLC, Acme Plumbing & Heating, Thermal Cell, Graber Insealators, Woodard Cooling & Heating, Schwartz Heating & Cooling, Insulated Concrete/Ballard Construction, Green River Appliance, Frontier Basement Systems, Disaster Emergency Services, KY Division of Forestry, UK Extension Office and KY Department of Air Quality and W.I.R.E. (Women in Rural Electrification). The Expo was from 3:00 p.m. to 6:30 p.m. with the business session lasting from 6:30 to 7:20. The business session included a welcome from the board chair, report of the board secretary concerning there being a quorum present, remarks by the President and CEO, Sandy Novick, and the awarding of scholarships. Door prizes were awarded throughout the evening, about every 30 minutes.

### Data on Most Recent (2010) and Four Previous Annual Meetings

	June 8, 2010	2009	2008	2007	2006
# Members in Attendance	541	451	660	258	431
# Members Voting for New Board Members	1,622	2,633	1,221	1,423	1,244
# of Board Members Elected or Re-Elected	3 Re-elected	1 Re-elected 1 New	4 Re-elected 1 New	3 Re- elected	2 Re-elected 1 New
Total Cost of Annual Mtg.	\$29,116	\$13,038	\$18,581	\$13,443	\$13,752

Note: Cost of Annual Meeting excludes staff labor and overhead.

2010 expenses include \$10,000 for scholarships.

Revised 04-22-2011

Reason for revision: Total cost for 2010 annual meeting was reported on PSC First Data Request for Information as \$29,179. This number has been changed to \$29,116 as outlined on attached list of detailed expenses. The difference is the \$63 for postage which was expensed by JE 3/31/10 and also taken as a debit against March 2010 cash deposits.

### **2011 RATE APPLICATION**

Item 23) Refer to the response to item 16 of Staff's Second Request. With the higher net salvage having been adjusted out of depreciation rates in the 2010 Depreciation Study, explain what factors are responsible for the .5 percent increase in rates for Account 364.000, Poles, Towers and Fixtures, and Account 365.000, Overhead Conductors and Devices.

Response) To understand the proposed .5 percent increase in rates for Account 364.000, Poles, Towers and Fixtures, and Account 365.000, Overhead Conductors and Devices requires an understanding of the current depreciation rate since the proposed rates are a direct calculation of the recommended life and net salvage. The fact that both accounts have a .5% increase is coincidental; it is not by plan or for any other reason. Table A below shows that the proposed life estimates are the same or longer and the proposed net salvage values are both less than the current. These parameter changes would normally result in an equal or lower depreciation rate. This indicates that the reason for the

Table A	A – Comparison of	Current and Prope	osed Life and Net	t Salvage
Account	ccount Life (Yrs)		Net Salvage (%)	
	Current	Proposed	Current	Proposed
364	30	32	-53	-51
365	36	36	-47	-40

deprecation rate increase in these accounts is the current depreciation rate.

The current approved depreciation rates were developed in the 2006 Depreciation Study. In the 2006 study the depreciation rates calculated from the current parameters in Table A generated the depreciation rates shown in Table B, column (c). These rates are significantly higher than the current

### **2011 RATE APPLICATION**

1

2

3

rates shown in Table B, column (d) because the 2006 Study recommended a transition plan that would move to the appropriate depreciation rates over a ten-year period.

	Table B – Comparison of Depreciation Rates (%)					
(a)	(b)	(c)	(d)	(e)		
	Rate	Rate Based on	2006 Rate	2010		
Account	Before 2006	2006 Life and	Recommended	Proposed		
	<u>Study</u>	Net Salvage	<u>&amp; Approved</u>	<u>Rate</u>		
364	3.1	5.1	4.2	4.7		
365	3.1	4.1	3.4	3.9		

The proposed depreciation rates for these accounts in the transition plan were approved by the

Commission and are roughly the half way point from the ten current 3.1% rate to the appropriate rate

determined by the life and net salvage (Table B, column (c)). It was expected that in the next study the

depreciation rates for these account would be increased the remaining amount to bring the account

depreciation rates to the appropriate long term level. The rates proposed in the 2010 Depreciation

Study shown in Table B, column (e) complete the transition to depreciation rates directly calculated

from the most appropriate life and net salvage estimates. These new rates are lower than the calculated

rates in the 2006 study because the life is longer in account 364 and the net salvage in both accounts is

### **2011 RATE APPLICATION**

Item 24) In the same format as provided for Exhibit 5 of the application, page 12, provide a depreciation schedule for both distribution and general plant accounts that includes test year depreciation expense by account. The schedule should reflect pro-forma adjustments as well as adjustments resulting from proposed depreciation rates.

**Response)** Item 24, page 2 of 2, contains the above referenced information.

Witness) Steve Thompson
